SHORT TITLE **AN ORDINANCE OF THE CITY COMMISSION OF THE CITY OF POMPANO BEACH, FLORIDA ADOPTING A COMPREHENSIVE PLAN MAP AMENDMENT FOR THE HABITAT FOR HUMANITY, BROWARD, INC. REQUEST LOCATED AT THE SW CORNER OF NW 15TH STREET AND NW 6TH AVENUE; PROVIDING FOR A DETERMINATION THAT A LOCAL PLANNING AGENCY HEARING WAS HELD ON APRIL 22, 2015; PROVIDING THAT A TRANSMITTAL AND ADOPTION PUBLIC HEARING WILL BE HELD; PROVIDING FOR SEVERABILITY; PROVIDING FOR CONFLICTS; AND PROVIDING AN EFFECTIVE DATE.**

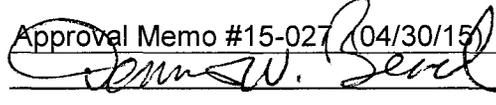

Summary of Purpose and Why:

This approximate 2.753-acre property is located on the south west corner of NW 6 Avenue and NW 15 Street. The owner, Habitat for Humanity, Broward, Inc., is requesting this small scale Future Land Use Plan Amendment (LUPA) from the City's "local" designation of Commercial (C) to Medium Residential (M). The applicant recently received a rezoning on the property to multifamily (RM-12). Additionally, 21 flex units were allocated to the property via Resolution 2015-143. Unlike most LUPA's, this request is for an amendment to the city's "local" plan. The amendment is required in order to develop single family dwelling units and is only permitted due to the previous flex allocation. Therefore the LUPA will only result in one flex unit reverting to the City. While the applicant intends to build 20 single family homes on the property, the maximum allowable density would permit 44 units. The Planning & Zoning Board recommended approval of this request in a 7-0 decision at the April 22, 2015 meeting. An excerpt of the draft April 22, 2015 Planning and Zoning Minutes are included.

RE: Habitat for Humanity 6th Avenue Small Scale Future Land Use Map Amendment
April 22, 2015 meeting P&Z # 15-92000001

Request

The Applicant is proposing a change in the future land use designation of a 2.753 gross-acre parcel. This subject property is generally located on the south west corner of NW 6 Avenue and NW 15 Street, as described in Exhibit A. Currently the parcel has a C (C) Future Land Use designation. The Applicant is requesting a change in the Local Land Use designation to Medium Residential 10-16 du/ac (M).

Proposed Development

The proposed land use would permit a maximum of 44 dwelling units. The applicant has indicated an intent to build 20 single family residential units, however for purposes of this analysis, the maximum density will be used.

A. Existing Land Use Designations - Density/Intensities

The existing commercial land use with the original B-2 zoning would have allowed for 449,669 square feet of C retail and office use on the 2.294 net acres of land.

B. Proposed Land Use Designation - Density/Intensities

The maximum allowable development use under the proposed residential M (10-16 du/ac) is 44 units.

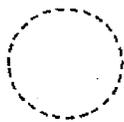

C. Rationale for the Proposed Amendment

The applicant recently received a rezoning on the property from Community Business (B-2) to multifamily (RM-12) in order to construct fee simple duplex homes. The applicant has been discussing the project with the surrounding community and determined single family homes are more desirable than duplex or townhomes at this location. The single family home cannot be constructed in C land use category utilizing flex units. This land use amendment will allow the single family units to be constructed and is consistent with the RM-12 zoning district. The current land use category is C. The requested land use category is residential M to be consistent with the remainder of the Habitat for Humanity project site.

D. Surrounding Land Uses – The subject property is surrounded by the following land use designations:

Direction	Actual use	Land use category
North	Single family homes	(L) Low 1-5 du/ac
West	Church	(M) 10-16 du/ac
South	High School	(M) 10-16 du/ac
East	Retail/ commercial	(C)

E. Proposed City Land Use Designation - The proposed land use designation is M.

F. Impact Analysis

The proposed intensity of the amendment area is a net decrease over what is currently allowed under the city’s adopted plan; the reduction in intensity is due to the elimination of the C land use and replacing it with Residential. The results of the impact analysis are provided below.

Sanitary Sewer

The proposed M Land Use is expected to decrease sanitary sewer flows by 29,567 gallons per day of sanitary sewer demand from what would be generated under the existing C Land Use Designation. The table below shows the difference in generation between the two uses.

Sanitary Sewer Impact			
	Use	Calculation	Total
Current	C 449,669 sq.ft.	X .1 GPD per sq.ft.	=44,967GPD
Proposed	M Res. 44 d.u.	X 350 GPD per d.u.	=15,400 GPD
		Change	-29,567 GPD

There is a letter verifying this information & the capacity of the County Wastewater treatment plant from the Broward County Public Works Department.

Potable Water

The new use is also expected to decrease the demand in potable water. The table below shows that demand for potable water will decrease by 35,654 gallons per day from what would be generated under the existing C Land Use Designation.

Potable Water Impact			
	Use	Calculation	Total
Current	C 449,669 sq.ft.	X .1 GPD per sq.ft.	=44,967GPD
Proposed	LM Res. 44 d.u.	X 350 GPD per d.u.	=15,400 GPD
		Change	-35,654 GPD

There is a confirmation from the City of Pompano Beach Engineering Division verifying the above information and stating that there is adequate capacity for this request.

Drainage

The site’s level of service standard requires the finished floor elevations to be above the 100-year flood elevation. The perimeter minimum elevation of the site must be above the 25-year, 3-day flood stage. The site has an existing 48” drainage pipe on NW 15th Street and a 24” drainage pipe on NW 6th Avenue serving drainage requirements for the area. The applicant states that all site development

will be designed to meet the minimum level of service required for drainage. A Drainage impact letter verifying the above information has been provided in the applicant's submittal.

Solid Waste

The new use is also expected to decrease the output of solid waste. The table below shows that the output for solid waste will decrease by 17,595 pounds per day from what would be generated under the existing C Land Use Designation. In the application, the applicant used a lower level of service number instead of the adopted minimum level of service, and therefore reflected a smaller decrease for the existing potential C use. The Table below reflects the correct minimum Level of Service and a Solid Waste impact letter verifying the above information has not yet been provided in the applicant's submittal.

Solid Waste Impact			
	Use	Calculation	Total
Current	C 449,669 sq.ft.	x 4lbs./100 sq. ft./day*	=17,987* lbs/day
Proposed	M Res. 44 d.u.	x 8.9 lbs/day	=392 lbs/day
		Change	-17,595 lbs/day

*The applicant used a lower LOS figure of 11lb/100sq.ft./day reflecting a differentiation of only -4,087.

Recreation and Open Space

The level of service standard for parks is 5 acres per 1,000 residents. The proposed change in land use designation will increase residential units by 44 units thereby expecting to house approximately 94 residents based on the current Comprehensive Plan's assumption of 2.13 average household size. The 94 additional people will generate the need for 0.19 acre of park area (5 acres/1000residents) and there is existing capacity in the city's park system to accommodate this demand.

In the application, the Applicant used a larger household size which brought the anticipated need to approximately .3 acres of park area. There is existing park capacity in the City to accommodate that need as well.

Traffic Circulation

Replacing C land use with M land use would result in a reduction of 19,163 average daily trips as presented below.

Traffic Impact			
	Use Code	Sq. Ft./Units	Total ¹
Current	C (820) 42.94/1k sf	449,669 sq.ft.	=19,309 trips/day
Proposed	M (220) 6.65/du	44 M du	=146 trips /day
		Change	-19,163 trips/day

¹ Average Daily Trips

Mass Transit

The residents of the 44 units will be served by the Pompano Beach Community Bus Blue Route, as well as Broward County Transit Bus Route 20. The applicant will be installing a sidewalk to provide safe movement for pedestrians and facilitate connectivity to these bus routes. A service letter from the Broward County Transit Division has been provided by the applicant.

Public Education

The applicant has applied for and received a School Consistency Review Report from the School Board. A copy of the completed report has been included in the submittal. The property is serviced by Sanders Park Elementary, Pompano Beach Middle School and Blanche Ely High School. The enrollment capacities are presented below.

School	Gross capacity	Over/ under gross capacity	Permanent capacity	15/16 projections
Blanche Ely High	3639	-1549	3473	2116
Pompano Beach Middle	1235	-196	1037	1060
Sanders Park Elementary	773	-204	661	584

The projected impact of the 44 units is 20 students (split out into elementary, middle and high school facilities). The Table below identifies projected demand per school and indicates that the capacity currently exists to accommodate the additional students.

School	Gross capacity	Over/ under gross capacity	Projected student addition	School future enrollment
Blanche Ely High	3639	-1549	5	2,121
Pompano Beach Middle	1235	-196	5	1,065
Sanders Park Elementary	773	-204	10	594

Natural and Historic Resources

The site does not contain any natural or historic resources.

Affordable Housing

The requirements of affordable housing units per the Broward County Land Use Plan Policy 1.07.07 do apply for this request since the proposed amendment is for less than 100 units. However, the applicant will be providing affordable housing voluntarily.

Land Use Compatibility

The proposed M use is compatible with the adjacent M Future Land Use designation to the west and south, and its residential nature is more compatible than the C has been with the Low Residential

Land Use to the north, as shown in the table below:

Direction	Actual use	Land use category
North	Single family homes	(L) Low 1-5 du/ac
West	Vacant/ Church	(M) 10-16 du/ac
South	High School	(M) 10-16 du/ac
East	Retail/ commercial	(C) C

Furthermore, the zoning on the site is RM-12 which is not consistent with the current land use. The land use designation should be changed to residential in order to be consistent with the zoning. This project is part of an overall 9-acre residential project. In order for the residential site to be constructed with the remainder of the property as single family the land use amendment is required.

Hurricane Evacuation Analysis

The subject property is not within a hurricane evacuation area.

Redevelopment Analysis

The property is within the N.W. Community Redevelopment Area. The property is currently vacant and due to its the location, commercial development is not a sustainable use. The surrounding lands are residential allowing for a more compatible use. This property will be combined with the land to the west to complete the overall residential community for Habitat for Humanity. The CRA letter is attached.

Intergovernmental Coordination

The subject property is not adjacent to any other local governments.

Goal

01.00.01 The attainment of a living environment which provides the maximum physical, economic and social well being for the City and its residents through the thoughtful and planned use and control of the natural and man-made environments that discourages urban sprawl, is energy efficient and reduces greenhouse gas emissions.

SAID LANDS SITUATE IN THE CITY OF POMPANO BEACH, BROWARD COUNTY, FLORIDA

AKA: Southwest corner of NW 6th Avenue and NW 15th Street

FROM: (C) Commercial

TO: M (Medium Residential 10-16 DU/AC)

STAFF CONTACT: Maggie Barszewski

Maggie Barszewski introduced herself to the board as the project planner. Mrs. Barszewski stated that this is a request for a future land use designation of a 2.753 gross-acre parcel. It is located on the south west corner of NW 6 Avenue and NW 15 Street. The request is from Commercial to Medium Residential 10-16 du/ac. The proposed land use would permit a maximum of 44 dwelling units but Habitat for Humanity is proposing to build 20 single family residential units, however for purposes of this analysis, the maximum density is considered for impact analysis. Mrs. Barszewski stated that the 44 possible units is compared to the maximum existing commercial land use & with the B-2 zoning that would have had a potential of 449,669 square feet of retail and office use on the subject property.

C. Rationale for the Proposed Amendment

Mrs. Barszewski stated that the rationale for the applicant is that the applicant recently received a rezoning on the property from Community Business (B-2) to multifamily (RM-12) in order to construct fee simple duplex homes. The applicant has been discussing the project with the surrounding community and determined single family homes are more desirable than duplex or townhomes at this location. The single family home cannot be constructed in C land use category utilizing flex units. This land use amendment will allow the single family units to be constructed and is consistent with the RM-12 zoning district. The current land use category is C (Commercial). The requested land use category is residential M (Medium) to be consistent with the remainder of the Habitat for Humanity project site.

F. Impact Analysis

Mrs. Barszewski stated that the proposed intensity of the amendment area is a net decrease over what is currently allowed under the city's adopted plan; the reduction in intensity is due to the elimination of the Commercial land use and replacing it with Residential. With the exception of parks/open space and education, the lesser intensity will result in a decrease in service impact.

F. Impact Analysis

Sanitary Sewer

Mrs. Barszewski stated that there is an expected decrease in sanitary sewer flows by 29,567 gallons per day. There is a letter verifying this information & the capacity of the County Wastewater treatment plant from the Broward County Public Works Department.

Potable Water

Mrs. Barszewski stated that the potable water is expected to decrease by 35,654 gallons per day. There is a confirmation from the City of Pompano Beach Engineering Division verifying the above information and stating that there is adequate capacity for this request.

Drainage

Mrs. Barszewski stated that the applicant states that the site will be designed to meet the minimum level of service required for drainage. A Drainage impact letter verifying the above information has been provided in the applicant's submittal.

Solid Waste

Mrs. Barszewski stated that solid waste will decrease by 17,595 pounds per day.

Recreation and Open Space

Mrs. Barszewski stated that the level of service standard for parks is 5 acres per 1,000 residents. The proposed change will generate the need for 0.19 of an acre of park area (5 acres/1000residents) and there is existing capacity in the city's park system to accommodate this demand.

For Traffic Circulation

Mrs. Barszewski stated that it is estimated that there would be a reduction of 19,163 average daily trips.

Public Education

Mrs. Barszewski stated that the proposed change would increase the demand on the public schools. The projected impact of the 44 units is approximately 20 students (split out into elementary, middle and high school facilities). In your report the tables show that each of these schools are currently under capacity and can handle the increased impact.

Land Use Compatibility

Mrs. Barszewski stated that the proposed Medium Residential Future Land use is compatible with the adjacent Medium Residential designation to the west and south, and its residential nature is more compatible than the Commercial designation has been with adjacent properties.

Mrs. Barszewski stated that furthermore, the zoning on the site is RM-12 which is not consistent with the current land use. The land use designation should be changed to residential in order to be consistent with the zoning. This project is part of an overall 9-acre residential project. In order for the residential site to be constructed with the remainder of the property as single family the land use amendment is required.

Consistency with Goals, Objectives and Policies of the City's Land Use Plan

Mrs. Barszewski stated that the proposed amendment is consistent with the following goals, objectives and policies of the Land Use Element of the Comprehensive Plan:

Goal

01.00.01 The attainment of a living environment which provides the maximum physical, economic and social wellbeing for the City and its residents through the thoughtful and planned use and control of the natural and man-made environments that discourages urban sprawl, is energy efficient and reduces greenhouse gas emissions.

Policies

01.03.05 All Land Use Plan Map amendments and rezonings shall provide for the orderly transition of varying residential land use designations.

01.03.04 Consider the preservation of established single family neighborhoods in all rezonings,
land use plan amendments and site plan approvals.

01.03.05 Consider density and intensity revisions with an emphasis on minimal negative impacts to existing residential areas, particularly single family areas.

01.03.11 Consider the compatibility of adjacent land uses in all Land Use Plan amendments and rezonings.

- 01.06.01 Consider the impacts that land use amendments, rezonings or site plan approvals have on natural resources and historic properties.

- 01.06.12 Review all land use plan map amendments, rezonings and site plan applications to insure that there is sufficient potable water resources available and that they pose no noxious impacts to the Biscayne Aquifer.

- 01.07.21 Annually evaluate the effect of land development regulations and permitting on the affordability of housing and take appropriate actions to support the affordability of housing. Continue to implement the incentives for providing affordable housing currently in the land development regulations including the use of flex units for affordable housing and the expedited permit review process for developments primarily aimed at providing affordable housing.

- 01.07.22 The city's land development code shall include provisions to encourage or enable a variety of housing opportunities in varying price ranges, including housing for low and moderate income families in large scale residential developments.

- 01.08.01 Follow the recommendation of the Community Redevelopment Plans in all Land Use Plan amendments and rezonings.

Objective Urban Infill Criteria

- 01.12.00 Establish criteria which encourage development of urban infill and community redevelopment areas to promote economic development, increase housing opportunities and maximize the use of existing public facilities and services.

G. Recommendation of Approval

Mrs. Barszewski stated that staff recommends approval of the Land Use Plan Map Amendment from the current C Future Land Use designation to Medium Residential for the property legally described in Exhibit A.

ALTERNATIVE MOTIONS:

- 1) **Motion to recommend approval** of the Land Use Plan Map Amendment from the current C Future Land Use designation to M for the subject property. The approval is based upon the finding that the amendment is compatible with the goals, objectives and policies in the Comprehensive Plan, that have been read into the record.

- 2) **Motion to table** the requested Comprehensive Plan amendment to provide time for any issues raised by the Board, Staff, Applicant or the general public.

Any person who decides to appeal any decision of the PLANNING AND ZONING BOARD/LOCAL PLANNING AGENCY with respect to any matter considered at this meeting will need a record of the proceedings and for such purpose may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. // kern

- 3) **Motion to recommend denial** as the Board finds the proposed land use change incompatible with the goals, objectives and policies that have been read into the record.

Mrs. Barszewski stated that the applicant is here if staff has any questions.

Jay Huebner (1489 W Palmetto Park Road Ste. 340 Boca Raton, FL 33486) introduced himself as the planner representing Habitat for Humanity. Mr. Huebner stated that the applicant is requesting a land use designation of Medium Residential because they cannot place single family homes on the property with the current Commercial designation. This residential land use designation will match the rest of the Habitat community, which is approximately nine acres in total. Mr. Huebner stated that they wish to place 3 and 4 bedroom single family homes on the property.

Jerry Mills asked if the applicant accepts all of staff's goals and policies. Mr. Huebner responded that the applicant does accept them.

Mr. Evans also asked if there are going to be twenty (20) units built or forty-four (44). Mr. Huebner stated that there will be twenty (20) units built. Mr. Huebner stated that the impact analysis in the staff report was done based on the maximum theoretical units that can be placed on the property, which is forty-four (44). However, there will only be twenty (20) units built.

Mr. Evans asked if there will be any recreational uses included in the new development. Mr. Huebner stated that this is a land use plan amendment and not a site plan, therefore they do not have specifics of the site plan with them today. Mr. Huebner also stated that this is a habitat for humanity project and they are building on individual single family lots. They do not have any public areas dedicated to public recreational facilities because the analysis shows that there are enough existing recreational facilities in the area. Mr. Evans asked what the analysis revealed. Mr. Huebner said there are enough parks in the area that have the capacity to support the number of children that will move into the area due to this project. Mr. Evans asked if this was accurate. Mr. Huebner responded that it is accurate. Mr. Huebner stated that the City has a calculation that looks at how many acres of recreational facilities are needed per person. Mrs. Barszewski stated that the applicant will have to provide a park impact fee for the single family residences. Mr. Huebner stated that these park impact fees will be paid at the time of development.

Mr. Evans asked Mr. Huebner what the approximate cost of the residential units will be. Perry Ecton (3564 N. Ocean Blvd. Fort Lauderdale, FL 33308) introduced himself to the board as the Executive Director of Habitat for Humanity of Broward. Mr. Ecton stated that, based on a market study completed 1.5 years ago, the estimated cost of the units will be \$150,000. Mr. Ecton stated that this price will be the minimum.

Walter Syrek asked if the land use change will cover about two (2) acres of the total nine (9) acres of Habitat for Humanity property in the area. Mr. Huebner confirmed. Mr. Syrek asked if the twenty (20) single family homes will just be built on the two (2) acres. Mr. Huebner confirmed. Mr. Syrek asked what will happen to the remaining seven (7) acres. Mr. Huebner stated that the entire property (all 9 acres) will be developed as a single family

Any person who decides to appeal any decision of the PLANNING AND ZONING BOARD/LOCAL PLANNING AGENCY with respect to any matter considered at this meeting will need a record of the proceedings and for such purpose may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based. // kem

home community, with seventy-eight (78) homes in total. Mr. Syrek asked which organizations or individuals in the neighborhood did the applicant speak to prior to this meeting. Mr. Huebner stated that they had several town hall meetings, including one at Blanche Ely High School. Mr. Huebner stated that essentially everyone within the 500 feet of the property showed up to the meeting. Mr. Huebner stated that through these meetings, they learned that single family homes was the direction the residents wanted to go in, so that is what they are doing.

Mr. Syrek asked if the property's zoning was RM-12. Mr. Huebner confirmed and restated that with this Land Use Plan Amendment, they are requesting to change from Commercial to Medium Residential (which allows 10-16 units per acre). Mr. Syrek asked if single family homes, duplex or townhomes are allowed in an RM-12. Mr. Huebner and Mrs. Barszewski confirmed.

Mr. Ecton stated that there should be a correction made to the location of the public hearing. It was not held at Blanch Ely High School, but at the community center. Mr. Syrek asked if they had any communication with the Sanders Park Homeowners Association. Mr. Ecton stated that he believes members of the association were at these meetings.

Jim Beeson asked if anyone from the audience would like to speak on this item. NO one answered.

MOTION was made by Jerry Mills and seconded by Richard Klosiewicz to recommend approval of the Future Land Use Map Amendment from C (Commercial) to M (Medium Residential). All voted in favor of the above motion; therefore the motion passed.

E. Applicant's rationale for the amendment.

The applicant recently received a rezoning on the property from Commercial B-2 to RM-12 residential to construct duplex fee simple Habitat for Humanity homes. The applicant has been discussing the project with the surrounding community and determined single family homes are more desirable than duplex or townhomes at this location. The single family home cannot be constructed in City Commercial land use category utilizing flex units. This land use amendment will allow the residential single family units to be constructed and is consistent with the RM-12 residential zoning. The current land use category is Commercial C. The requested land use category is residential M (10-16 DU/AC) to be consistent with the remainder of the Habitat for Humanity project site.

3. AMENDMENT SITE DESCRIPTION

A. Concise written Description of the size and boundaries of the area proposed to be amended. (Legal)

The existing use of Commercial C maximum capacity is 449,669 square feet of commercial use. The proposed M 10-16 Du/Ac has a maximum unit count of 44 residential units. The daily trips generated by the commercial use is 19,280. The residential units generate 421 trips per day. The possible residential uses generate significantly lower traffic impacts compared to the possible commercial uses. See attached ITE generation calculations as exhibit C.

4. EXISTING AND PROPOSED USES

A. Current and proposed City of Pompano Beach Comprehensive Plan Future Land Use designation(s) for the amendment site. If multiple land use designations, describe gross acreage within each designation.

The existing land use designation for the proposed site is Commercial C. The proposed land use designation is residential M (10-16 Du/Ac)

B. Current land use designations for the surrounding properties.

C.

Direction	Actual use	Land use category
North	Single family homes	(L) Low 1-5 DU/AC
West	Church	(M) 10-16 DU/AC
South	High School	(M) 10-16 DU/AC
East	Retail/ commercial	(C) Commercial

D. Current and proposed zoning for the amendment site.

The existing and proposed zoning is RM-12. The zoning was recently amended from Commercial B-2 to RM-12 in December 2014.

F. Proposed use of amendment site including square footage and/or dwelling unit count proposed for each parcel.

The proposed use of the amendment will allow a maximum of 16 units per gross acre. The amendment site is 2.753 gross acres allowing for a maximum of 44 residential units.

G. Maximum allowable development under existing designation for the site, including square footage for each non-residential use and/or dwelling units.

The existing commercial land use with the original B-2 zoning would allow for 449,669 square feet of commercial retail and office use on the 2.294 net acres of land.

H. Maximum allowable development under proposed designation for the site, including square footage for each non-residential use and/or dwelling units.

The maximum allowable development use under the proposed residential M (10-16 du/ac) is 44 units.

5. ANALYSIS OF PUBLIC FACILITIES AND SERVICES

The items below must be addressed to determine the impact of an amendment on existing and planned public facilities and services. If more than one amendment is submitted, calculations should be prepared on an individual and cumulative basis.

A. SANITARY SEWER ANALYSIS

- i. Provide the adopted level of service and the current level of service.**
The level of service for the current commercial use is 0.1 GPD per square foot of commercial building.
The level of service for residential single family is 350 GPD per residential unit.
- ii. Identify the facilities serving the amendment area including the plant capacity, current demand on plant capacity and committed plant capacity.**
The sanitary sewer is serviced by the City of Pompano Beach. The city pumps its sewer to Broward County wastewater treatment plant. The Broward County Plant capacity is 100 MGD. The current demand is 82 MGD. The plant has capacity for the land use amendment.
- iii. Identify the additional demand resulting from this amendment – provide calculations including assumed demand per square foot or dwelling unit.**
The existing commercial use demand is $449,669 \times 0.1 = 44,966$ GPD.
The proposed residential use demand is $44 \times 350 = 15,400$ GPD.
The land use amendment would result in a net decrease in demand of 29,566 GPD.
- iv. Identify the projected plant capacity and demand for the short and long range planning horizons as identified within the adopted comprehensive plan provide demand projections and information regarding planned capacity expansions including year, identified funding sources and other relevant information.**
The County plant capacity is 100 MGD. The future 2025 projected demand is 95 MGD.
Please see attached letter from Broward County Wastewater department with the requested information as exhibit D.

- v. **Identify the existing and planned service to site- provide information regarding existing and proposed trunk lines and lateral hookups to the amendment site.**

The site has an existing 8" gravity sewer system on NW 15th Street and NW 6th Avenue capable of serving the site sanitary needs. See attached letter from the City of Pompano Beach Utility Department.

B. POTABLE WATER ANALYSIS

- i. **Provide the adopted level of service standard and the current level of service.**

The level of service for the current commercial use is 0.1 GPD per square foot of commercial building.

The level of service for residential single family is 350 GPD per residential unit.

- ii. **Identify the facilities serving the amendment area including the plant capacity, current demand and committed demand.**

The site is serviced by the City of Pompano Beach water treatment plant. The current plant capacity is 50 MGD. The committed demand is 13.1 MGD.

- iii. **Identify the wellfield serving the amendment area including the permitted capacity, remaining capacity and expiration date of the permit.**

The City currently has a SFWMD well permit for 17.75 MGD thru 2025. Please see attached letter from the City of Pompano Beach Utilities as Exhibit E.

- iv. **Identify the additional potable water demand resulting from this amendment provide calculations including assumed demand per square foot or dwelling unit.**

The existing commercial use demand is $449,669 \times 0.1 = 44,966$ GPD.

The proposed residential use demand is $44 \times 350 = 15,400$ GPD.

The land use amendment would result in a net decrease in demand of 29,566 GPD.

- v. **Identify the projected or planned capacity for the short and long range planning horizons as included within the adopted comprehensive plan - provide demand projections and information regarding planned plant capacity expansions including year, funding and other relevant information. If additional wellfields are planned, provide status including the status of any permit applications.**

- vi. The current plant capacity is 50 MGD with a SFWMD permit for 17.75 MGD. If the actual demand increases in the future, a permit for up to 50 MGD can be obtained. Please see attached letter from the City of Pompano Beach Utilities as Exhibit E.

- vii. **Identify the existing and planned service to site- provide information regarding existing and proposed trunk lines and water main hookups to the amendment site.**

The existing property has an existing 36" DIP water main on NW 15th Street and a 8" DIP water main on NW 6th Avenue to service the site potable water requirements.

C. DRAINAGE ANALYSIS

- i. **Provide the adopted level of service standard for the amendment area and current level of service.**

The site level of service standard requires the finish floor elevations to be above the 100 year flood elevation. The perimeter minimum elevation of the site must be above the 25-year, 3 day flood stage.

- ii. **Identify the facilities serving the service area in which the amendment is located.**

The site has an existing 48" drainage pipe on NW 15th Street and a 24" drainage pipe on NW 6th Avenue serving drainage requirements for the area.

- iii. **Identify any planned drainage improvements including year, funding sources and other relevant information.**

No planned drainage improvements by the City in the area. The on-site drainage system will be designed to meet the level of service required for drainage purposes.

- iv. **Indicate if a Basin Surface Water Management Plan has been approved by the South Florida Water Management District for the amendment area. Also, indicate if the Basin Surface Water Management Plan is currently undergoing review for modification.**

The property currently has not been approved by the SFWMD and is not under review at this time. The project will be permitted thru SFWMD and Broward County EPD as part of the permitting process.

- v. **If the area in which the amendment is located does not meet the adopted level of service and there are no improvements planned to address the deficiencies, provide an engineering analysis which demonstrates how the site will be drained and the impact on the surrounding properties. The information should include the wet season water level for the amendment site, design storm, natural and proposed land elevation, one hundred year flood elevation, acreage for proposed water management retention area, elevations for buildings, roads, and yards, storage and runoff calculations for the design storm and estimated time for flood waters to recede to the natural land elevation.**

The surrounding areas meet the level of service for drainage purposes. The proposed site development will be designed to meet the minimum level of service required for drainage purposes.

- vi. **Letter from the Drainage District verifying the above information (if applicable).**
Please see the letter from Broward County EPD regarding the required drainage design parameters as exhibit F.

D. SOLID WASTE

- i. **Provide the adopted level of service standard and the current level of service.**
The level of service for solid waste single family unit is 8.9 pounds per day.
The level of service for commercial uses is 1 pound per 100 square feet.
- ii. **Identify the facilities serving the amendment area including the landfill/plant capacity, current demand on landfill/plant capacity and committed landfill/plant. The city of Pompano Beach provided garbage and recycling pick up for residential single family units. Commercial uses are required to use a solid waste and recycling company for solid waste disposal.**
The garbage is disposed of at the Broward county land fill.
- iii. **Identify the additional demand resulting from this amendment- provide calculations including assumed demand per square foot or dwelling unit.**
The existing use of 449,669 square feet of commercial equates to 4,496 pounds per day.
Residential use of 44 single family units x 8.9 = 392.
This results in a net decrease in solid waste demand of 4,104 pounds per day.
- iv. **Identify the projected landfill/plant capacity and demand for the short and long range planning horizons as identified within the adopted comprehensive plan provide demand projections and information regarding planned capacity expansions including year, identified funding sources and other relevant information.**
The city has a contract with Waste Management to transport the garbage to the Monarch Hill land fill. The land fill has a capacity of 24,000,000 cubic yards and is projected future life capacity of 17 years. The land fill information and recycling is provided in the letter by the city of Pompano Beach as exhibit G.
- v. **Identify the existing and planned service to site.**
The city of Pompano Beach will provide service to the proposed site twice a week.
- vii. **Letter from service provider verifying the above information.**
See attached letter from the City of Pompano Beach as Exhibit G.

E. RECREATION AND OPEN SPACE ANALYSIS

- i. Provide the adopted level of service standard and the current level of service.**
The level of service required for the site is 2 acres per 1000 capita within the City of Pompano Beach.
- ii. Identify the parks serving the amendment area including acreage and facility type, e.g. neighborhood, community or Regional Park.**
The site currently has the following parks serving the future development:
 1. Westside Park, Ely school – neighborhood park - 6.5 ac.
 2. Pompano Beach municipal golf course – 63.75 ac.
 3. Pompano Beach aquatics center – Community park
 4. Quite water regional park – regional park
 5. Kester field – 8.4 acres - neighborhood
 6. Pompano Beach baseball park – community park
- iii. Identify the additional need for park acreage resulting from this amendment.**

HSQ Project Number: **1406-34**

Dear Lech:

Habitat for Humanity is developing the 2.753 acre property located at the Southwest corner of NW 15th Street and NW 6th Avenue. The developer is seeking a land use plan amendment (LUPA) to change the land use from Commercial (C) to Residential M (10-16 DU/AC). Please provide information required as follows:

A. DRAINAGE ANALYSIS

i. Provide the adopted level of service standard for the amendment area and current level of service.

The site level of service standard requires the finish floor elevations to be above the 100 year flood elevation. The perimeter minimum elevation of the site must be above the 25-year, 3 day flood stage.

ii. Identify the facilities serving the service area in which the amendment is located.

The site has an existing 48" drainage pipe on NW 15th Street and a 24" drainage pipe on NW 6th Avenue serving drainage requirements for the area.

iii. Identify any planned drainage improvements including year, funding sources and other relevant information.

No planned drainage improvements by the City in the area. The on- site drainage system will be designed to meet the level of service required for drainage purposes.

iv. Indicate if a Basin Surface Water Management Plan has been approved by the South Florida Water Management District for the amendment area. Also, indicate if the Basin Surface Water Management Plan is currently undergoing review for modification.

The property currently has not been approved by the SFWMD and is not under review at this time. The project will be permitted thru SFWMD and Broward County EPD as part of the permitting process.

- v. If the area in which the amendment is located does not meet the adopted level of service and there are no improvements planned to address the deficiencies, provide an engineering analysis which demonstrates how the site will be drained and the impact on the surrounding properties. The information should include the wet season water level for the amendment site, design storm, natural and proposed land elevation, one hundred year flood elevation, acreage for proposed water management retention area, elevations for buildings, roads, and yards, storage and runoff calculations for the design storm and estimated time for flood waters to recede to the natural land elevation.

The surrounding areas meet the level of service for drainage purposes. The proposed site development will be designed to meet the minimum level of service required for drainage purposes.

Please provide information required as follows:

A. SOLID WASTE

- i. **Provide the adopted level of service standard and the current level of service.**
The level of service for solid waste single family unit is 8.9 pounds per day.
The level of service for commercial uses is 1 pound per 100 square feet.
- ii. **Identify the facilities serving the amendment area including the landfill/plant capacity, current demand on landfill/plant capacity and committed landfill/plant. The city of Pompano Beach provided garbage and recycling pick up for residential single family units. Commercial uses are required to use a solid waste and recycling company for solid waste disposal.**
The garbage is disposed of at the Broward county land fill.
- iii. **Identify the additional demand resulting from this amendment- provide calculations including assumed demand per square foot or dwelling unit.**
The existing use of 449,669 square feet of commercial equates to 4,496 pounds per day.
Residential use of 44 single family units x 8.9 = 392.
This results in a net decrease in solid waste demand of 4,104 pounds per day.
