VII. Follow-up – Updates:

- USACE/Broward County Resiliency Study

A collaborative study between Broward County and the USACE to evaluate coastal flood risk associated with the combined influences of seasonal high tides, high-frequency storm surge, and sea level rise. Results of this study will inform the development of recommended resiliency standards for sea wall top elevations under future sea level conditions, additional

flood management needs, and provide an economic assessment of damage loss reductions that can be achieved with modeled adaptation measures.

- Code revision 91.10(C) regarding commercial and multi-family docking into the navigable channel
- Code revision 151.03 (6) Structures (pilings) in waterways
- Hydrographic survey and maintenance dredging prioritization – Anthony Alhashemi, Project Manager
