**SECTION I - SPECIFICATIONS/SPECIAL CONDITIONS**

**A. Pre-Bid Conference**

There will be a pre-bid conference to review the specifications and bid forms and answer questions from potential bidders on **November 24, 2014 beginning at 10:00 a.m.** in the 2nd Floor EOC Room, (Utilities Administration,) 1205 N.E. 5TH Avenue, Pompano Beach, 33060. Attendance at this meeting is not mandatory to bid, but is highly recommended. During this meeting the Utilities Department will explain the procedures, and their performance expectations.

**B. Intent**

The intent of this bid solicitation is to establish multiple contracts for the completion of reuse connection services, including but not limited to connecting single family home residential

customers to the reuse system where there is reuse available. Firms previously eliminated from this program due to negligent, or poor performance will not be considered.

Successful bidder(s) must be able to perform all of the following within the time limit specified:

1. Secure plumbing permit.
2. Call Sunshine 811 for underground utilities locations.
3. Remove existing dual check valve on the potable line.
4. Install a new City supplied dual check valve on the potable line.
5. Disconnect the existing irrigation system from the current water supply by capping off the existing connection from the irrigation system to the potable, well or canal supply. If a well exists the suction line to the well must be capped off.
6. Perform check for cross-connections by running the irrigation system through all zones and verifying that all outside faucets still have water. Check all sinks, bathtubs, toilets etc. to see if those still have water (both hot and cold sides) within the home and outside the home (also boat docks). Only the irrigation system should be out of water. If any sink or tub or other area within the home –or outside the home- is out of water, the lines are cross-connected. Fill out the Reuse Inspection Form and leave in the permit bag for the Plumbing Inspector. If the customer is not home, then proceed to step 7, **BUT DO NOT CONNECT PIPING TO REUSE METER**. A physical separation of a foot or 12” (air gap) must exist until cross connect inspection is completed by plumber. Call customer to schedule when cross connection test can be done. Do not proceed to the next step without having completed the cross connection check and filled out the form. **IF TEST FAILS, STOP ALL WORK AND CALL THE UTILITIES DEPARTMENT IMMEDIATELY.**
7. Install new purple piping from the meter to the control valve using Pantone 522C irrigation pipe.
8. Connect the reuse water meter to the existing irrigation system.
9. Request plumbing inspection from City Building Inspections Division.
10. Restore site which can include sodding, asphalt, concrete pavers, etc.

C. Contract Period

The initial contract period shall be one year, commencing upon award by the appropriate City officials.

The City reserves the right to renew this agreement for two (2) additional one-year periods subject to vendor acceptance, satisfactory performance and determination that renewal will be in the best interest of the City. All terms, prices and conditions shall remain firm for the initial period of the contract, and any renewal period. Contractor may submit annual price adjustments for parts only.

In the event service is scheduled to end because of the expiration of this contract, the Contractor shall continue to deliver/service upon the request of the General Services

Director. The extension period shall not extend for more than ninety (90) days beyond the expiration date of the existing contract. The Contractor shall be compensated for the product/service at the rate in effect when this extension clause is invoked by the City.

D. Quantities

No warranty or guarantee is given or implied as to the total value of work to be assigned. Work will be ordered as needed.

E. Rotating List / Eligibility

The intent of this solicitation is to establish a list of multiple qualified vendors to be assigned work on a rotating basis. Qualified vendors must demonstrate professional behavior at all times and provide excellent customer service.

In order to be eligible to be included on the rotating list a firm must submit a complete response to this solicitation by the deadline, and have a current business tax receipt as required to perform work in Pompano Beach, and have a current working automatic fax and/or email to receive work orders, and provide the required proof of insurance, and complete the work as assigned with fewer than three call-backs.

Insurance must be continuously in force during the contract term; replacement certificates must be provided to the City before the expiration date of the current certificate or your firm will be removed from the rotating list.

A firm will be removed from the rotating list for failure to complete the work as assigned, requiring a call back to correct deficiencies, three or more times

F. Work Authorization

After an eligible customer has signed up for connection, the Utilities Department will prepare a Work Authorization for that property. The Utilities Department will forward the Work Authorization to the next eligible vendor on the rotating list. That vendor will have twenty-four (24) hours to contact the Utilities Department. The vendor will have the opportunity to either accept or reject the required work at the proposed price. Before acceptance of a job, the vendor should review the work to be performed at the property site. In the event that the irrigation control valve is not within 8 feet of the meter, the contractor will submit an estimate for additional footage at \$15 per foot. Special circumstances, such as crossing paved surfaces will require a quote and will be negotiated on a case-by-case basis.

Should the next eligible vendor reject the Work Authorization within the allotted time, that vendor will be moved to the end of the rotation, and the Work Authorization shall be issued to the next eligible vendor. Should the same vendor refuse three (3) or more jobs, that vendor shall be removed from the rotating list.

In an instance where every eligible vendor refuses the same Work Authorization, the Utilities Department shall retract, reevaluate and reissue a new Work Authorization to the next eligible vendor.

G. Completion

After acceptance of the Work Authorization, the vendor must apply for a building permit with the City's Building Inspections Division. All jobs are to be completed as soon after the permit has been issued as is reasonably possible. At no time and for no reason shall a job be outstanding for greater than fifteen (15) business days. The Building Inspections Division shall be contacted immediately upon completion of all work for a final inspection.

You shall furnish the City the certification or proof of insurance required by the provisions set forth below, within five (5) days after notification of the pending award of contract.

All awarded bidders will be required to provide proof of coverage to the City throughout the contract term to be eligible to receive work orders.

The Contractor further agrees to be responsible for employment, control and conduct of its employees and for any injury sustained by such employees in the course of their employment.

If a contractor elects an exemption from mandatory Workers' Compensation coverage, per Florida law, the City will require the contractor to complete and sign an affidavit affirming the exemption. In all cases contractors must agree to be responsible for the employment, control and conduct of their employees and for any injury sustained by such employees in the course of their employment.

Contractor will pick up the dual check, test report form, and yard sign from the City Utilities Department compound located at 1201 NE 3<sup>rd</sup> Avenue. Contractor will remove existing double check and box, if underground, and install the new dual check onto the potable water meter and reconnect meter to piping. Contractor will leave removed double check or reduced pressure zone backflow with the customer. Any existing dual check backflow removed will be returned to the City Utilities Department compound. Contractor will leave work open and call for an inspection by the City Building Inspections Division. When the job has passed inspection Contractor will backfill, sod and patch as needed to return the site to its pre-existing condition. Contractor will notify the City and send the invoice to the City Finance Department for payment to the address on the purchase order. Contractor will need to take pre and post pictures or videos of all job sites for protection from customer damage claims. Dual check must match size of the customer side water service line. Not meter size. Verify the size during pre-job inspection.

2. New Reuse Service: Installation of a City provided dual check on potable water meter, and lying of pipe from reuse meter to existing irrigation system control valve. No tie-ins will be made to the irrigation system piping. Upon job authorization from the City, the Contractor will proceed to acquire permit(s). Contractor will pick up the dual check, test report form, and yard sign from the City Utilities Department compound located at 1201 NE 3 Avenue. Contractor will install a new City provided dual check on the potable water meter and reconnect to existing pipe. Any existing dual check backflow removed will be returned to the City Utilities Department compound. Contractor will disconnect the existing irrigation system from the current water supply by capping off the existing connection from the irrigation system to the potable, well or canal supply. Contractor will check for cross connections by running irrigation system through all zones and checking all faucets, toilets and water connected fixtures (hot & cold sides) within the home and all outside faucets outside the home (also boat docks if applicable) to make sure water is available. Only the irrigation system should be out of water. If any sink or tub or other area within the home at home- is out of water, the lines are cross-connected. If the customer is not at home then the Contractor will call customer to schedule the check, and contractor CAN NOT connect piping to reuse meter, A physical separation of a foot or 12" (air gap) must exist until cross connection inspection is completed by Contractor. Contractor must perform this check before proceeding. Contractor will fill out the Reuse Inspection Form Exhibit X. This form must be left in the permit bag on-site for the Plumbing Inspector. IF CROSS CONNECTION TEST FAILS, CONTRACTOR STOPS ALL WORK AND CALLS UTILITIES IMMEDIATELY. If test shows no cross connection, Contractor will connect new purple (pantone 522C0 pipe from reuse meter to existing irrigation control valve. Existing above ground pipe and new below ground pipe may be painted to match pantone 522C. All new pipes will be

pantone 522C throughout its length. Contractor will install, if needed, a pressure relief valve per code and Spec Sheet (PO.01). Contractor will leave work open and call for inspection by the City Building Inspections Division. When the job has passed inspection – backfill, sod and patch as needed to return the site to its pre-existing condition. Contractor will notify the City and send the invoice to the Utilities Department for payment to the address on the purchase order. Contractor will need to take pre and post pictures or videos of all job sites for protection from customer damage claims. Dual check must match size of the customer side water service line. Not meter size. Verify the size during pre-job inspection.

3. New Reuse Service/No Irrigation System: Installation of a City provided dual check on potable water meter, and installation of City provided hose box and coiled purple hose. This will be used when customer does not have in ground sprinkler system. Same instruction as #2 except the Contractor will install a hose box onto the outlet of the reuse meter.

Where customers have an alternative water supply such as a well or canal, Contractor will connect to existing piping, will install a valve to turn system on and off and will cap suction line to well or canal. The reuse connection will be made by connecting a Pantone 522 C pipe from the reuse meter to the valve or solenoid. At the customer’s expense, a solenoid valve and an electrical connection to the existing time clock will be needed to make operation of sprinkler system automatic. The City will not provide a time clock for the operation of the sprinkler system.

All installations shall conform to applicable Plumbing Codes and attached Diagrams and Specifications Sheet (PO.O1). Contractor must accept the job authorization within 24 hours after issued. All jobs must be completed within 15 business days.

Any existing hose faucets on existing sprinkler piping will have to be removed when converting to reuse.
