ADDENDUM #3, BID E-38-16

Design-Build Services for Construction of New Fire Station No. 24

To Whom It May Concern,

Please review the following Proposal clarifications and questions submitted by potential proposers, with corresponding answers from the City.

PROPOSER QUESTIONS

Q1. The survey provided by the City with the RFP (Exhibit J-6) appears to conflict with adjacent topographic survey data and the Finished Floor Elevation referred to in Exhibit J-2, Airspace Study Plan. The elevations shown on the survey (Exhibit J-6) indicates a FFE of 8.58' NAVD for the Station, where Exhibit J-2 indicates a FFE of 11.0' NAVD. Please clarify the elevations and DATUM used for the (Exhibit J-6) Topographic Survey.

Response: 1) Topographic survey data and related Finished Floor Elevations provided on Exhibit J-6 are for the existing fire station facility. Finished Floor Elevations listed on Exhibit J-2 are for the proposed facility and are noted as "for preliminary design purposes only..." in "Note 1." Contractor is responsible for submitting a Proposal with realistic assumptions regarding building and site elevations that conform to minimum Florida Building Code, local Broward County requirements as well as recently updated FEMA FIRM maps. 2) Section **4.E.17** on **Page 9** of the proposal provides additional clarification on minimum building floor elevation requirements. All Exhibit J-2 values are NAVD 88 and Exhibit J-6 survey elevation references are as listed in "Note 10." of this exhibit.

This revised RFP proposal Addendum #3 is posted on the City's website: <http://pompanobeachfl.gov/index.php/pages/purchasing/purchasing>. Proposers must submit their Proposal with this revised information and acknowledge *in writing* the receipt of this addendum on **Page 25** Proposal Signature Page of this Proposal.
