

# WINTER ONCOLOGY SYMPOSIUM

Saturday January 23, 2016

Holy Cross Hospital • Sister Innocent Conference Center  
Fort Lauderdale, Florida

Holy Cross Hospital's Michael and Dianne Bienes Cancer Center in collaboration with the Massachusetts General Hospital Cancer Center present the Winter Oncology Symposium 2016

# WELCOME

## TO THE WINTER ONCOLOGY SYMPOSIUM 2016.

### Program Goal

This symposium will provide a comprehensive update on the latest advances in the diagnosis and treatment of various cancers, including melanoma, brain and oropharyngeal. It will explore innovative approaches to the overall care of cancer patients and survivors including genetic testing advances, use of new therapeutic agents and the latest surgical techniques.

### LEARNING OBJECTIVES

- Review the management of side-effects during chemo/RT
- Explain therapy de-escalation for HPV positive patients
- Define the role of trans-oral robotic resection for oropharyngeal carcinomas
- Discuss approaches to the systemic management of metastatic melanoma including combination immune check point inhibitors and molecular targeted therapy
- Present a multi-disciplinary approach to managing brain metastases in patients with melanoma
- Define current standards and changing practice in managing high-risk and in-transit melanoma
- Review the standard of care for the treatment of gliomas, and realize future endeavors exist that may change the care of gliomas
- Determine why and how to perform awake surgeries in a subset of patients with gliomas
- Define hyper-coagulable state – PAI-1 4/5g polymorphism
- Understand how to manage double expressing and double hit DLBCBL
- Differentiate the use of oral agents in relapsed CLL
- Understand MDS treatment post demethylating agent failure, including new trials and understandings
